Antex Western Corporate Social Responsibility (CSR)

For Antex Western, Corporate Social Responsibility (CSR) reaches beyond our donations and volunteering time to worthy causes. For us, CSR incorporates the three Ps: People, Planet and Profit. For Antex Western, CSR means operating in a way that: is responsible for and meets the needs of our staff, clients, trades and our suppliers (People), is respectful of the environment dealing with issues along the entire value chain (Planet) and is supportive of and invests in the communities in which we live and work (Profit).

In striving to be a leader in CSR we:

- provide our employees with a work environment that allows them to meet both their personal and professional goals
- create a culture that allows a new employee to grow and develop while realizing that they are valued
- supports a culture that values diversity of thought, gender and ethnicity
- offer business products and services that are socially and environmentally responsible
- invest in the well-being of the communities we serve through fundraising and community service
- adopt business practices that are socially and environmentally responsible
- advocate for social and environmental responsibility with the aim of making a positive difference to the individuals and communities around us

We have made Corporate Social Responsibility an integral part of our business and day to day lives because Corporate Social Responsibility represents the way we do business.
